

BIONIC RIB SUPPORT PROTECTION

AUTO - KART PROTECTION

SIZES: S/L - XL/3XL

A high-performance, lightweight, ergonomically constructed supportive guard for the ribs, the Bionic Rib Support incorporates adjustable shoulder straps, a central chest belt and an adjustable back panel to offer kart drivers a supremely comfortable, customized and supporting fit.

1. The technical, multi-layered main construction has been optimized for a performance fit and enhanced comfort:
 2. The advanced, soft poly-Lycra inner lining means the Bionic Rib Support can be worn under or over a garment.
 3. The main body incorporates a 3mm high density poly-foam layer laminated with 3mm absorption EVA for enhanced impact and anti-vibration performance.
- 600D textile outer for high resistance to friction and enhanced durability.
 - Dual-density, strategically positioned, ergonomically shaped rib guards incorporate fiberglass core and robust PE hardshell outer for excellent shock dispersion and damping performance.
 - The specially selected materials and components to offer crucial weight-saving performance.
 - Central adjustable back panel with hook and loop attachments offers a complete range of fitment, allowing the guard to be worn under or over a garment.
 - The fully adjustable front strap with D-ring closure features elasticated section for comfort.
 - The adjustable shoulder straps are constructed from highly breathable 3D mesh for optimum airflow and feature an elasticated gusset for a snug performance fit.
