

YOUTH BIONIC RIB SUPPORT PROTECTION

AUTO - KART PROTECTION

SIZES: OS

A high-performance, lightweight, ergonomically constructed supportive guard for the ribs, the Youth Bionic Rib Support incorporates adjustable shoulder straps, a central chest belt and an adjustable back panel to offer kart drivers a supremely comfortable, customized and supporting fit.

1. The technical, multi-layered main construction has been optimized for a performance fit and enhanced comfort:
2. The advanced, soft poly-Lycra inner lining means the Bionic Rib Support can be worn under or over a garment.
3. The main body incorporates a 3mm high density poly-foam layer laminated with 3mm absorption EVA for enhanced impact and anti-vibration performance.

- Anatomically optimized for an enhanced Youth fit.
- 600D textile outer for high resistance to friction and enhanced durability.
- Dual-density, strategically positioned, ergonomically shaped rib guards incorporate fiberglass core and robust PE hardshell outer for excellent shock dispersion and damping performance.
- The specially selected materials and components to offer crucial weight-saving performance.
- Central adjustable back panel with hook and loop attachments offers a complete range of fitment, allowing the guard to be worn under or over a garment.
- The fully adjustable front strap with D-ring closure features elasticated section for comfort.
- The adjustable shoulder straps are constructed from highly breathable 3D mesh for optimum airflow and feature an elasticated gusset for a snug performance fit.
